5.3 Advice for firefighters

In case of fire: Wear self-contained breathing apparatus. Co-ordinate fire-fighting measures to the fire surroundings. Do not inhale explosion and combustion gases. Use water spray jet to protect personnel and to cool endangered containers. Collect contaminated fire extinguishing water separately. Do not allow entering drains or surface water.

SECTION 6: Accidental release measures

6.1 Personal precautions, protective equipment and emergency procedures

Provide adequate ventilation. Avoid dust formation. Use personal protection equipment. Special danger of slipping by leaking/spilling product.

6.2 Environmental precautions

Do not allow to enter into surface water or drains. Cover drains. Do not allow to enter into soil/subsoil.

Take up mechanically. Treat the recovered material as prescribed in the section on waste disposal.

6.4 Reference to other sections

None

SECTION 7: Handling and storage

7.1 Precautions for safe handling

All work processes must always be designed so that the following is as low as possible: Inhalation of dust/particles If handled uncovered, arrangements with local exhaust ventilation have to be used. It is recommended to design all work processes always so that the following is excluded: Eye contact Only use the material in places where open light, fire and other flammable sources can be kept away. Wear personal protection equipment (refer to section 8).

Protective measures

Measures to prevent fire

Provide earthing of containers, equipment, pumps and ventilation facilities. Take precautionary measures against static discharges.

Measures to prevent aerosol and dust generation

Provide adequate ventilation as well as local exhaustion at critical locations.
